

Application No.: 10/773849

Docket No.: CTW-028

**AMENDMENTS TO THE CLAIMS**

1. (Currently Amended) An electric power tool comprising

a gear housing,a main housing which is coupled to a rear end of the gear housing,a light source capable of emitting light, wherein the light source is disposed at a front end of the main housing on an underside of the gear housing, andat least one component of said electric power tool at least part of which is selfluminous, the component being capable of storing at least part of the light emitted from the light source and emitting light, wherein the selfluminous component is an annular component mounted around a front end of the gear housing and disposed where the component is directly exposed to the light emitted from the light source, andan annular groove provided in the front end of the gear housing for removably receiving the annular selfluminous component.

2. (Canceled)

3. (Currently Amended) An electric power tool in accordance with claim 1,2 ~~further comprising a gear housing and a main housing which is coupled to a rear end of the gear housing, wherein the light source is disposed at a front end of the main housing on an underside of the gear housing, and further wherein the selfluminous component is an annular component mounted around a front end of the gear housing wherein the selfluminous component is disposed immediately forward of the light source.~~

4. (Currently Amended) An electric power tool in accordance with claim 1-3, wherein the selfluminous component ~~has an annular shape~~ is made of a rubber containing a selfluminous material.

5.—13. (Canceled)
